

## **ITP Funds Projects of Interest to MTI Members**

DOE's ITP sector has provided substantial funding for MTI projects during the last four or five years. While ITP's funding has decreased during the last two years, ITP continues to fund projects of interest to MTI members in the chemical and refining industries. As results of the previously funded projects are becoming available, ITP shares those results in reports and on the ITP website. ITP also sends an electronic Newsletter to interested parties in an effort to share new results and outline future directions. The link to the Newsletter is <http://www.eere.energy.gov/industry/resources/ebulletin/>.
